**Attachments:** BP Oil Burn Fact Sheet 8-22-16\_RNH.doc; DeMarini et al Oil Burn 8-30-16\_RNH.docx

Good morning David,

I have returned the STICS record after adding copies of the manuscript and fact sheet with changes/comments made using Track Changes. I found several errors in the manuscript that are for the most part, grammar. However, there are one or two that are more weighty. More important, I found the fact sheet/impact statement lacking. The impact statement is simply re-states the results of the study. The impact statement should clearly state what problem is being addressed and why the findings are important, i.e., who cares?

Also, your memo to me indicates that once cleared, the paper would be shared with OAR prior to submission. In reality, that is what the advance notification process now accomplishes. Thus, Kavlock will send it to ACE and I will include a note to ensure they share the paper with both OAR and OW.

I have attached the manuscript and fact sheet with track changes to this note as well. Once corrected, simply reload into STICS and it should be routed back to me for advance notification.
